I-Mid Semester Exam March 2025

Branch: CSE Semester: VI

CS603(A) Salesforce Development (SALESFORCE II)

Time 1:30 Hrs

Max. Marks 20

Note: All questions are compulsory and have internal choice.

Ques.1: Explain the difference between **With Sharing**, **Without Sharing**, and **Inherited Sharing** in Apex. Provide an example where each might be used. **(CO1 5Marks)**

OR

What is the purpose of Governor Limits in Apex? List any three governor limits that developers must consider while writing Apex code.

Ques.2: create an **Apex Trigger** that ensures whenever a new **Contact** is inserted, its **Last Name** must not be blank. If it is blank, set it to "Unknown". Write the **trigger code** to achieve this. **(CO1 5 Marks)**

OR

The following Apex method is throwing a Null Pointer Exception. Identify the error and correct it:

```
apex
CopyEdit
public class AccountHandler {
    public static String getAccountName(Id accountId) {
        Account acc = [SELECT Name FROM Account WHERE Id =: accountId];
        return acc.Name.toUpperCase();
    }
}
```

Ques 3: Write an **LWC JavaScript controller** to fetch **Account records** from Apex and display them in a list format on the UI. (Assume the Apex method is named `getAccounts()`) **(CO2 5 Marks)**

OR

Write a **Lightning Web Component (LWC)** that allows a user to input an **Account Name** and create a new **Account record** using an Apex method. Explain how `@api` decorators work in LWC.

Ques 4: What are **Trigger Context Variables** in Salesforce? List and explain at least four important context variables used in Apex Triggers. **(CO2 5 Marks)**

OR

What is the purpose of **Exception Handling** in Apex? Explain the types of exceptions in Apex and demonstrate how to handle exceptions using `try`, `catch`, and `finally` blocks.
