

LNCT UNIVERSITY, BHOPAL
B.TECH (CSE) VI SEMESTER
EXAMINATION (NOVEMBER-2024)
Salesforce Development (SALESFORCE II) (CS-603)(A)

Maximum Marks: 70

Time Allowed: 3 Hours

Note:- Attempt all questions. Internal choice is given.

SECTION – A

I. Short Answer Type Questions (Attempt Any Five) [5×6=30]

- i. What are Triggers in Salesforce? Mention the difference between before and after trigger events.
- ii. Write the structure of a basic Apex trigger with an example.
- iii. What is the role of the `@isTest` annotation in Apex testing?
- iv. Define the Lightning Web Component (LWC) and state two benefits over Aura Components.
- v. What is a Named Credential and how is it used in Apex callouts?
- vi. Define Agentforce and mention two of its key use cases.
- vii. What are standard vs custom objects in Salesforce? Give one example of each.

SECTION – B

II. Long Answer Type Questions (Attempt Any Four) [4×10=40]

- i. Explain the best practices in **Trigger design** including **bulkification** and **avoiding recursion**.
- ii. Describe the components of a **Batch Apex class**. Write a sample class showing the use of **start**, **execute**, and **finish** methods.
- iii. Explain how to **schedule** a batch job and monitor it in Salesforce. Also, highlight the importance of **test classes**.
- iv. Discuss the **anatomy of an LWC**. How are **HTML**, **JavaScript**, and **metadata** files structured within a Lightning Web Component bundle?
- v. Compare **REST** and **SOAP APIs** in Salesforce. How do you configure a **callout** from Apex with secure authentication?
- vi. Explain how to **configure Agentforce**: setting up agent profiles, communication channels, and omni-channel routing for productivity.
