**First Mid Semester Examination,
Design Thinking and Innovation(CS604)
Branch: CSE-Semester: VI**

Time 1:30 Hrs

Max. Marks 20

Q.1

- a) Define **Design Thinking**. How is it different from traditional problem-solving approaches?
 - b) Briefly explain any two **principles of Design Thinking**.
- (CO1 – 5 marks)

OR

- a) A company wants to revamp its customer service system using design thinking. What process steps would you recommend?
- b) Compare any two **models of Design Thinking** commonly used in product innovation.

Q.2

Evaluate the importance of **Design Thinking** tools like **prototyping** and **user feedback** in solving real-world problems.

OR

Explain with an example how a **design thinking** case study helped redesign a public service or commercial product. What key lessons were learned? (CO1 – 5 marks)

Q.3

- a) Define **empathizing** in the context of design thinking. Why is it important in the early stages?
- b) Discuss any two **ideation tools** such as **brainstorming** and **innovation heuristics**. (CO2 – 5 marks)

OR

- a) You are designing an app for senior citizens. How would **observation** and **structured interviews** help during the research phase?
- b) What is **cognitive fixedness**, and how can it be overcome during the ideation process?

Q.4

Assess how **behavioral models** and **design frameworks** assist in developing human-centered solutions. Give an example.

OR

Design a classroom activity for students that applies **listening** and **empathizing techniques**. Mention the objectives and expected outcomes. (CO2 – 5 marks)
