Second Mid Semester Examination
Design Thinking and Innovation(CS604)

Branch: CSE-Semester: VI

Time 1:30 Hrs

Max. Marks 20

Q.1

a) Define the following diagrams with one key use of each in design thinking:

- Empathy Map
- Affinity Diagram
- Journey Map

b) Explain the difference between **Primary Research** and **Secondary Research** in the context of contextual inquiry.
(CO3 – 7 Marks)

OR

a) How can **mind mapping** and **empathy mapping** be used together to identify user pain points in a product redesign project?

b) A team is combining several small ideas into one large innovative concept. How can **mapping tools** support this process?

Q.2

a) Define **storytelling** in the context of design thinking. How does it aid in communicating user needs and ideas?

b) Explain the difference between **scenario planning** and **improvisation**. How are these useful in prototyping?
(CO4 – 7 Marks)

OR

a) What are the **three levels of prototyping** (soft, medium, final)? Give an example of each.

b) Explain how **frameworks** and **usability studies** are used to evaluate the effectiveness of design communication.

Q.3

a) What are the **engineering aspects** considered in a design project? Briefly explain any two: electrical, mechanical, material, or safety.

b) Define **entrepreneurship**. Discuss any two **challenges** commonly faced by early-stage startups.
(CO5 – 6 Marks)

OR

a) You are launching a product as a startup founder. Explain the **fundamentals required to initiate a startup**.

b) How can a well-defined **business model** and **reliability aspect** ensure long-term success of a design solution?
