Second Mid Semester Examination

Salesforce Development (CS-603) A (SALESFORCE II)

Branch: CSE Semester: VI

Time 1:30 Hrs

Max. Marks 20

Q.1

a) Define **Lightning Web Components (LWC)**. List any three advantages of LWC over Aura Components.
(CO3 – 7 marks)

b) Describe the **anatomy of an LWC bundle**. What are the roles of HTML, JavaScript, and Meta XML files?
OR

a) Explain the concept of **Lifecycle Hooks** in LWC. Mention any two important hooks and their purposes.

b) How is **event handling** achieved in LWC? Describe with a simple example involving parent-child communication.

Q.2

a) What is the difference between **REST** and **SOAP APIs** in Salesforce? Give one use-case for each.
(CO4 – 7 marks)

b) Explain how to perform a **callout from Apex** using REST API. What is the role of **Named Credentials**?
OR

a) Describe the steps to create an **inbound RESTful service** in Salesforce.

b) What is **OAuth 2.0** and how does it secure Salesforce integrations?

Q.3

a) What is **Agentforce**? Briefly explain its role and features in the Salesforce ecosystem.
(CO5 – 6 marks)

b) Describe how to **configure agent availability and skills** in Agentforce.

OR

a) What is **Omni-Channel** in Salesforce? How does it help improve agent productivity?

b) List and explain any two **standard vs custom objects** in Salesforce with examples.
